[REPORT OVERVIEW](#)

2003 Survey of APPIC Members with Postdoctoral Programs

Questions that required written responses are displayed by individual query. The "Report Overview" button or "Back" button will return you to your survey results.

Each individual respondent is referenced under the # column.

Please tell us how you use the APPIC Web, if you do. What other resources should be added to the APPIC web that would be helpful to Postdoc members and postdoctoral fellows?

| 1 | Training Resources |
| 2 | I use the web especially as a reference regarding, for example: APPIC policies; the reports from the Competencies Conference; samples of training materials from other sites; looking at listings of other sites in the Directory. What would be helpful?: more samples of training materials from other sites (eg, postdoc evaluation forms; bibliographies for training in disability issues; outlines for workshops in xyz), more aids for postdocs themselves (eg, the job bank you mention; or advice on interviewing, networking, tuning your c.v.; or uptodate reviews of EPPP test prep materials/strategies) |
| 3 | I read it to stay abreast of most current information. |
| 4 | More discussion; |
| 5 | I use it to change our write up |
| 6 | I rarely visit the website |
| 7 | Web provides some basic post-doc information, but would like to see a specific page for post-doc information. Right now all training recources are on one page with intership information. |
| 8 | We review all the postings and utilize the site for listing post-doc vacancies. |
| 9 | We use it primarily for recruitment, though our postdocs would certainly find it useful if it included job listings. |
| 10 | I like to follow discussions. |
| 11 | Comparative salary data. |
